PROFILE

I am a results-driven finance and business intelligence professional with a BCom in Economics and Risk Management and am currently completing a BSc in Information Technology (Distance Learning) at North-West University, expected in early 2027.

Currently serving as a Supervisor: Financial Reporting at Sibanye-Stillwater, I have experience in financial reporting, procurement, business intelligence, credit management, and data analytics across the mining, pharmaceutical, wholesale, and industrial sectors. I specialize in transforming complex data into actionable business insights using advanced Microsoft Excel, Power BI, SQL, and ERP systems including SAP, Syspro, and Coupa.

Recognized for my analytical thinking, strong work ethic, and collaborative approach, I am committed to delivering data-driven solutions that improve operational performance, support strategic decision-making, and drive continuous business improvement. I also hold NOSA safety qualifications, including SAMTRAC, Legal Liability, and NEBOSH IGC.

PROFESSIONAL STRENGTHS:

- Acts as a strategic knowledge resource to Executive Management, supporting initiatives that enhance overall organizational performance and decision-making quality.
- Demonstrates the ability to improve operational efficiency and productivity through business diversification and process optimization, without increasing costs or expenses.
- Strong business insight with a focus on talent optimization and performance intelligence.
- Excellent communication skills that support effective collaboration, operational execution, and production processes.
- Proven leadership capability with experience in managing investment funds and pension-related responsibilities.
- Thrives in high-pressure, deadline-driven environments while maintaining accuracy and professionalism.
- High level of computer literacy, including Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Adobe Reader, and Power BI.

Bsc Information Technology (In progress) North-West University – Distance Program	2024–In Progress

WORK EXPERIENCE

Sibanye Stillwater

20 APRIL 2026 – PRESENT

Supervisor Financial Reporting

Responsible for consolidating, analysing, and validating operational and financial data across multiple gold mining operations to produce accurate month-end financial reports and management packs. Prepare detailed cost and operational performance analyses, identify key business drivers and variances, and provide meaningful insights that support strategic decision-making by senior management. Manage budget loading, perform detailed store cost analysis, and update key figures in SAP, ensuring the accuracy, completeness, and integrity of financial and operational data used for reporting and business planning.

S Buys Wholesaler (Pty) Ltd

1 SEPTEMBER 2024 – 18 APRIL 2026

Procurement Specialist

Responsible for the strategic planning and execution of promotions across multiple suppliers and product categories, ensuring alignment with business objectives and market demand. Led the sourcing, onboarding, and system integration of new suppliers, while maintaining accurate procurement and stock records within internal systems.

Managed system-driven stock control processes to optimize inventory levels, reduce holding costs, and ensure product availability. Built and maintained strong supplier relationships to enhance collaboration, service levels, and long-term partnerships. Oversaw contract negotiations, compliance monitoring, and renewal processes, incorporating training initiatives and promotional support into supplier agreements where required.

Handled creditors' claims to ensure accurate processing, timely dispute resolution, and financial integrity. Actively identified and improved outdated procurement and operational processes to enhance efficiency and effectiveness. Supported executive management and leadership teams through the development of reports, data analysis, and feedback mechanisms, enabling informed decision-making. Additionally, managed the ordering of new stock items and special orders through structured stock ordering and invoicing processes.

Austell Pharmaceuticals

2 AUGUST 2021 – 31 AUGUST 2024

Debtors Manager

Responsible for the effective management of debtor accounts to ensure timely collection of all outstanding payments in line with agreed credit terms. Provided administrative and financial support to the sales and finance departments by supplying accurate payment information, preparing financial statements, and resolving invoicing and account-related queries.

Managed key client accounts with a focus on maintaining healthy financial relationships and minimizing financial risk. Regularly communicated with clients to resolve disputes, clarify billing issues, and ensure payments were received within contractual terms. Allocated and reconciled client payments using Pastel, while monitoring and controlling credit limits to prevent account breaches.

Developed and distributed monthly financial reports and business intelligence reports for both clients and senior management, enabling improved visibility into account performance and quicker decision-making. Played an active role in setting up new client contracts, ensuring system access to relevant stock items, and maintaining up-to-date administrative records in compliance with internal procedures. Collaborated closely with internal departments to promote efficient workflows, accurate reporting, and high levels of client satisfaction.

References and certificates available upon request.

Credit Controller Level 2

Responsible for the full credit control function, ensuring monthly invoices were accurately generated and distributed to mines and contractors in line with agreed payment cycles and cut-off dates. Provided comprehensive administrative and financial support to the sales and finance departments, including the preparation of financial reports, payment schedules, and the resolution of invoicing and account-related queries.

Managed mine and contractor accounts, maintaining consistent stock levels at onsite stores throughout the month. Analyzed stock consumption trends at mining sites and compiled actionable data for area managers to support effective inventory planning and cost control. Allocated client payments and managed debtor accounts using Syspro, while closely monitoring account activity to ensure compliance with credit terms.

Built and updated weekly and monthly management reports to provide senior leadership and area managers with timely insights into sales, stock movement, and account performance. Oversaw the setup of new client contracts, ensuring correct system access to all relevant mine and retail stores. Managed personal employee transactions on mine accounts to ensure accurate deductions and reporting. Operated effectively in deadline-driven environments to maintain consistent cash flow, applying in-depth knowledge of mine payment terms and procedures to ensure invoices were processed before payment cut-off dates.

Futurus Financial Wealth Group (Momentum)

7 JANUARY 2018 – 13 DECEMBER 2018

Financial Planner

Provided comprehensive financial planning services by conducting detailed financial needs analyses to support clients with retirement planning, estate and bequeathment needs, life and disability cover, and investment strategies. Delivered personalized financial advice and generated tailored quotations for life insurance, disability cover, and investment solutions, ensuring alignment with each client's short- and long-term financial goals.

Managed client investment portfolios and retirement funds to optimize growth while balancing risk in line with individual financial profiles. Analyzed existing investments and retirement annuities to guide clients on future financial decisions and portfolio adjustments. Worked closely with corporate clients to manage and maintain retirement annuities, ensuring employee participation, compliance, and accurate coverage administration.

As an Investment Analyst, monitored market-related funds and bonds to assess performance, stability, and return potential. Ensured that each client's investment portfolio was structured and managed according to their unique financial needs, risk tolerance, and investment horizon. Conducted ongoing portfolio reviews to ensure investments remained relevant and competitive.

In the role of Medical Aid Broker, assessed clients' healthcare needs and provided informed advice on suitable medical aid options, ensuring appropriate coverage while balancing affordability and benefit structure.
